

Searching for a Facility in WACS Training Video Transcript

This video will demonstrate how to search for a facility in the WACS database.

Before creating a new WACS ID, you will need to search the database to see if a record already exists.

In order to search, go to the Solid Waste Main page, and click on “Search for a Solid Waste Facility”.

On this page, you can search by facility name, historic facility name, address, or city. To search by a word that begins the facility name, type word%, then Facility Search to get a list of records; to search by a word that could appear in any part of the facility name, type %word% to get a list of records; these procedures will also work in searching for historic facility names by selecting “Search Historic Facility Names if NO results are found.”

If you do not see the facility you are looking for after attempting all of these procedures, you may create a new WACS ID.
