GAZETTEER OF FLORIDA STREAMS

INTRODUCTION

Florida has an abundance of water in its thousands of sparkling lakes and hundreds of clear streams. The majority of the streams are in northern and northwestern Florida. Two of these streams form parts of the state boundary, the Perdido River on the west and the St. Marys River on the northeast. Further, several other streams have their headwaters in Alabama and Georgia and flow through Florida to the Gulf of Mexico.

This gazetteer lists, both alphabetically and by principal basin, all fresh water streams in Florida named on the topographic maps of the U. S. Geological Survey. The stream names include such designations as slough, bayou, hollow, fork, prong and head as well as the more common designations such as river, creek, branch, brook, and run. The maps used in order of preference were the latest 7½-minute quadrangles, scale 1:24,000; the 7½-minute quadrangles, scale 1:31,680; the 15-minute quadrangles at a scale of 1:62,500; and the 120-minute maps prepared by the Army Map Service at a scale of 1:250,000 and available from the U. S. Geological Survey. These large scale maps were used to provide data for those areas not covered by 15-minute or 7½-minute quadrangles. Maps of the Florida State Road Department also were used.

The stream information in this gazetteer is arranged in five general river basin groups; namely, Northwest Florida (NW), Suwannee—St. Marys (SU), St. Johns (SJ), Southwest Florida (SW) and Lake Okeechobee—Everglades (LO). These basins are delineated on the index map, page viii. Principal streams are shown on the basin index maps, which serve to separate the basins.

The gazetteer consists of two parts; Part I, the alphabetical listing of streams in the state and Part II, the five basin groupings with the streams arranged alphabetically. Information shown in this part includes the stream name, length in miles, elevation at both the source and the mouth, average fall in feet per mile, the drainage area (where known), body of water into which the stream flows, location of the stream mouth by county and topographic quadrangle and special notes. An "R" in the "Remarks" column signals a footnote. The topographic quadrangles are referenced by number and a list of all topographic maps in Florida is included. Blanks indicate that data were not available. A "G" in the "Remarks" column identifies the availability of streamflow data (other than miscellaneous measurements) from the Water Resources Division, U. S. Geological Survey.

There are 1711 streams listed. Their lengths range from 0.4 mile to 318 miles. Profiles, developed from the topographic maps and reports, are included for selected streams in each basin. Inclusion of a profile is noted by a "P" in the "Remarks" column.

Neither the intracoastal waterways nor those streams that are salt water and not rivers in the accepted sense of the word, such as the Indian River and Banana River are included. In general, canals have also been omitted. However, to provide a readily referenced listing, the principal canals of the Central and Southern Florida Flood Control District are listed at the end of the Lake Okeechobee—Everglades Basin. This information was furnished through the cooperation of the Central and Southern Florida Flood Control District.

The drainage areas are those developed by the Water Resources Division, U. S. Geological Survey and accepted as official drainage areas by the Federal Interagency River Basin Committee. For ready reference the USGS River Basin Groups map showing drainage areas is included in this gazetteer on pages vi and vii. Drainage areas were determined as prescribed by the Federal Interagency River Basin Committee using the best maps available at the time of the determination. These areas are reported in square miles to the first decimal place. The total drainage area is noted in the "Drains" column. The drainage area in states other than Florida is footnoted.

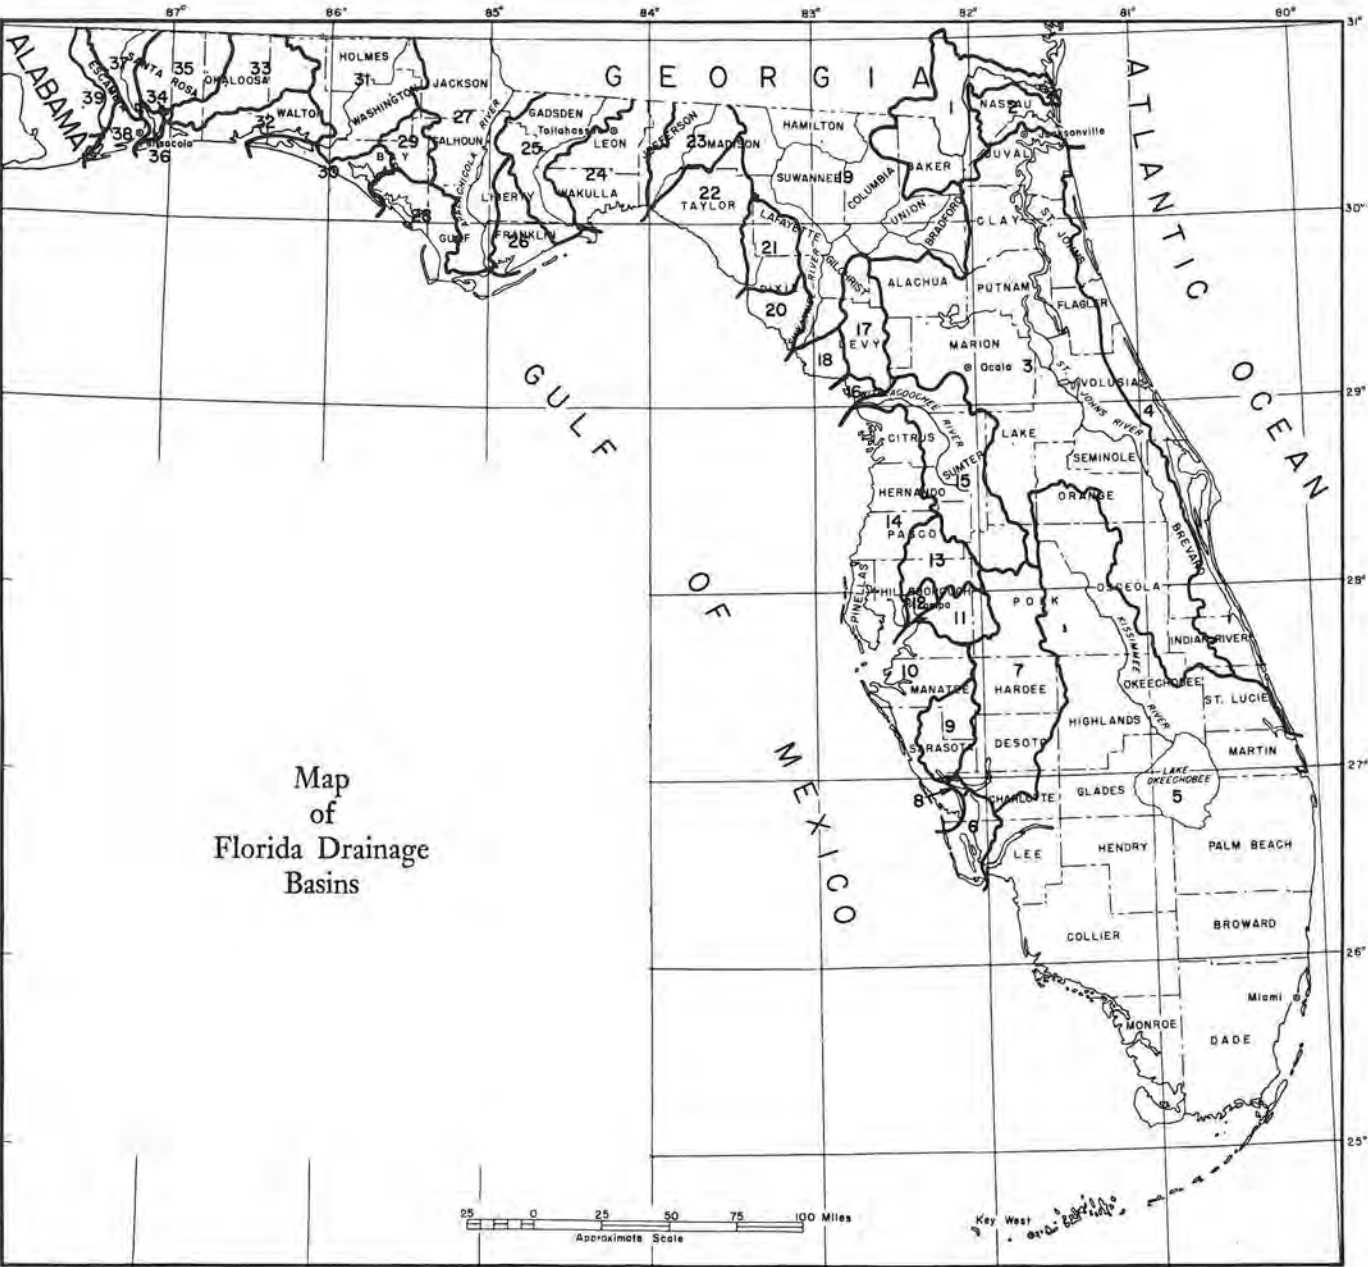

A map measure was used to determine the length of streams. Division personnel made all measurements using U. S. Geological Survey topographic maps, and the length in miles is reported to the first decimal place. Although some streams occasionally have no flow, none has been designated intermittent. Streams crossing the state line were measured to their principal headwater. The total length, where available, is noted in the "Length in Miles" column, Part II. Where a stream flows in two states the length in Florida is footnoted.

The measuring of streams, the computation of data, and the preparation of data for this gazetteer, including the development of stream profiles, were performed by personnel of the Division of Water Resources and Conservation. Preparation of the gazetteer was supervised by Donald P. Schiesswohl, Engineer, and Frank C. Mohler, Chief Hydrologist. All data have been placed on punch cards, and the tabulations were performed by the Data Processing Section of the Florida Board of Conservation, under the supervision of Joe Wright, Section Head.

FLORIDA DRAINAGE AREAS

Developed by U. S. Geological Survey
for
Federal Interagency River Basin Committee

DRAINAGE BASIN	DRAINAGE AREA (Square Miles)	
	Florida	Total
1. St. Marys River Basin-----	940	1,500
2. Coastal basins between St. Marys River and St. Johns River-----	470	470
3. St. Johns River Basin-----	8,800	8,800
4. Coastal basins between St. Johns River and Lake Okeechobee and the Everglades-----	2,200	2,200
5. Lake Okeechobee and the Everglades Basins-----	17,000	17,000
6. Coastal basins between Lake Okeechobee and the Everglades and Peace River-----	270	270
7. Peace River Basin-----	2,300	2,300
8. Coastal basins between Peace River and Myakka River-----	6	6
9. Myakka River Basin-----	540	540
10. Coastal basins between Myakka River and Alafia River-----	1,100	1,100
11. Alafia River Basin-----	420	420
12. Coastal basins between Alafia River and Hillsborough River-----	90	90
13. Hillsborough River Basin-----	690	690
14. Coastal basins between Hillsborough River and Withlacoochee River--	1,400	1,400
15. Withlacoochee River Basin-----	2,000	2,000
16. Coastal basins between Withlacoochee River and Waccasassa River--	80	80
17. Waccasassa River Basin-----	530	530
18. Coastal basins between Waccasassa River and Suwannee River-----	190	190
19. Suwannee River Basin-----	4,200	9,900
20. Coastal basins between Suwannee River and Steinhatchee River-----	350	350
21. Steinhatchee River Basin-----	590	590
22. Coastal basins between Steinhatchee River and Aucilla River-----	930	930
23. Aucilla River Basin-----	740	950
24. Coastal basins between Aucilla River and Ochlockonee River-----	1,200	1,300
25. Ochlockonee River Basin-----	1,100	2,300
26. Coastal basins between Ochlockonee River and Apalachicola River---	550	550
27. Apalachicola River Basin-----	2,300	20,000
28. Coastal basins between Apalachicola River and Econfina Creek-----	520	520
29. Econfina Creek Basin-----	440	440
30. Coastal basins between Econfina Creek and Choctawhatchee River---	310	310
31. Choctawhatchee River Basin-----	1,500	4,600
32. Coastal basins between Choctawhatchee River and Yellow River-----	690	690
33. Yellow River Basin-----	870	1,400
34. Coastal basins between Yellow River and Blackwater River-----	4	4
35. Blackwater River Basin-----	710	860
36. Coastal basins between Blackwater River and Escambia River-----	60	60
37. Escambia River Basin-----	440	4,200
38. Coastal basins between Escambia River and Perdido River-----	170	170
39. Perdido River Basin-----	250	920
Total within Florida (excluding bays, sounds, and harbors) about 56,900 sq. mi.

SOUTHWEST FLORIDA

A detailed map of the Okeechobee Everglades region in Florida. The map shows the following counties: ORANGE, POLK, OSCEOLA, HIGHLANDS, GLADES, ST. LUCIE, MARTIN, PALM BEACH, HENDRY, COLLIER, BROWARD, and DADE. Major water bodies include LAKE OKEECHOBEE, LAKE GLADES, LAKE MARTIN, LAKE PALM BEACH, LAKE HENDRY, LAKE COLLIER, LAKE BROWARD, and LAKE DADE. The map also shows the Gulf of Mexico to the west and the Atlantic Ocean to the east. A north arrow is located in the upper left corner. The title 'OKEECHOBEE EVERGLADES' is prominently displayed in the upper right corner.
