Recycling is just part of the overall solution. The ultimate goal is to eliminate or reduce the generation of as much waste as possible prior to recycling or disposal.

The Department of Environmental Protection has pollution prevention coordinators and retired engineers in each district available to provide ***FREE*** *technical assistance to your business to eliminate and reduce waste BEFORE it is generated.*

The DEP pollution prevention coordinator for your area is **Laura Comer.** *She can be reached at* ***(239)332-6975 x170****.*

REDUCE, REUSE

Much of the waste discarded in Florida is recyclable material that if diverted can save valuable landfill space and help keep disposal costs down for both businesses and residents. A business can often recycle enough to reduce the size of their garbage container or the frequency of collection and this in turn saves them money.

The Recycle Guys are being brought to you by:
