

EMPLOYEE TRAINING – ILLICIT DISCHARGE

What is Illicit Discharge? Any discharge to a storm drain system that is not solely rainwater.

Rain picks up pollutants and carries them through the City's drainage network all the way to the lagoon and ocean. The pollution contributes to poor water quality, fish kills, algae blooms and beach closures.

YOU can help while you're working. Look for these pollution sources.

❖ **Illegal Dumping:**

❖ **Illegal Pipe Connection:**

❖ **Dirt Leaving Construction Sites:**

❖ **Chemicals Entering the Water:**

*If you find signs of illicit discharge while working, please notify your direct supervisor.
It is important to fill out the illicit discharge section of any inspection form.*
