"Container Type" is used to indicate whether the container is plastic (P) or glass (G). Sample must be refrigerated or stored in wet ice after collection. The maximum temperature during storage should be 6°C (42.8°F). Under "Preservative," list any preservatives that were added to the sample container.

pH < 2 : 0 BEAS Temperature: 3.8°C

1. $\mathcal{A} = \{A_1, A_2, \dots, A_n\}$ is a family of n sets. $\mathcal{A}$ is called a *partition* of S if $A_i \cap A_j = \emptyset$ for $i \neq j$ and $\bigcup_{i=1}^n A_i = S$. If $\mathcal{A}$ is a partition of S , then the sets A_i are called the *parts* of the partition.
