Sample Type: is used to indicate whether the sample was a grab (G) or whether it was a composite (C).

Sample Matrix: is used to indicate whether the sample is being discharged to drinking water (DW), groundwater (GW), surface water (SW), beach inflow water (BSW), salt surface water (SSW), soil sediment (SMNT), or sludge (SLDG).

Sample Type: is used to indicate whether the container is plastic (P) or glass (G).  
Sample must be refrigerated or stored in wet ice after collection. The minimum temperature during storage should be 0°C (32°F). Under "Preservative," list any preservatives that were added to the sample container.

Preservative: has a label identifying sample ID, preservative present, a container in the bottle, sample type, client ID, and parameters for analysis.

1. Each following information should be added to each bottle label after collection with permanent black ink: date and time of collection, sampler's name or initials, and any field number or ID.

2. Each following information should be added to each bottle label after collection with permanent black ink: date and time of collection, sampler's name or initials, and any field number or ID.

3. All bottles and containing preservative may be added to each bottle label after collection with permanent black ink: date and time of collection, sampler's name or initials, and any field number or ID.

4. The client is responsible for documentation of the sampling event. Please note: special sampling events on the sample custody form.
