Station ID

Saline Water Sample Matrix (Fresh / Marine)

Sample Type

Enterococci E. coli (SM9223B Quantitray)

E. coli = 250 mL, Entero = 120 mL, Fecal Coliform = 120 mL

Sample Type: It used to indicate whether the sample was a grab (G) or a bottom (B) and a composite (C).

Sample Matrix: It used to indicate whether the sample is being analyzed for drinking water (DW), groundwater (GW), surface water (SW), shell water (SW), or sediment (SD).

Container Type: It used to indicate whether the container is plastic (P) or glass (G).

Sample must be refrigerated or stored in ice after collection. The maximum temperature during storage should be 4°C (40°F). Under "Preservation" the two parameters that were added to the sample container.

Each bottle has a label identifying sample ID, preservation, temperature, container type, station ID, and instrument for analysis.

The following information should be provided for each collection with personnel that take, date and time of collection, sample's name or number, and any field number or ID.

All bottles not containing preservative may be rinsed with appropriate sample prior to collection.

1. The client is responsible for documentation of the sampling system. Please use the following sampling system on this sample container form.
