HISTORIC MHW DISTANCE VS TIME PLOTS

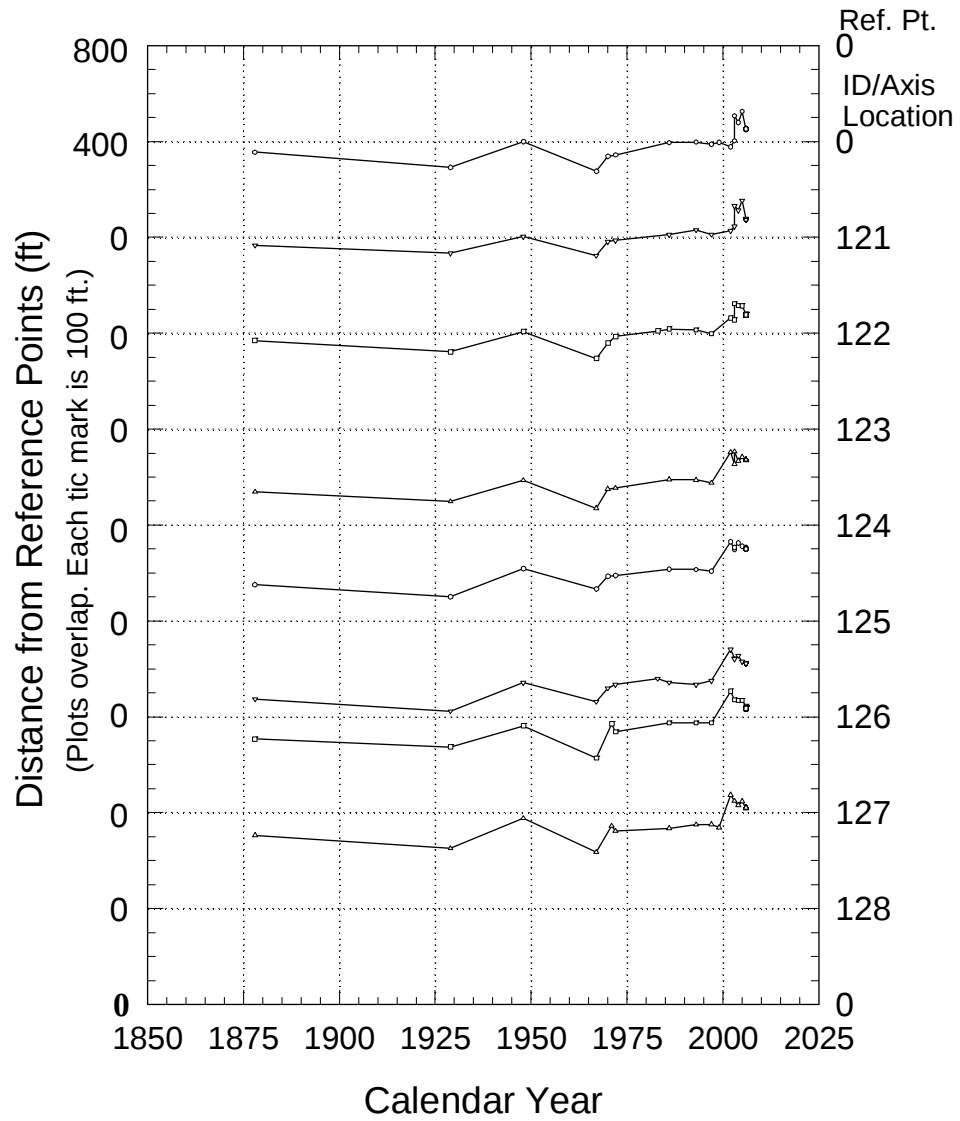

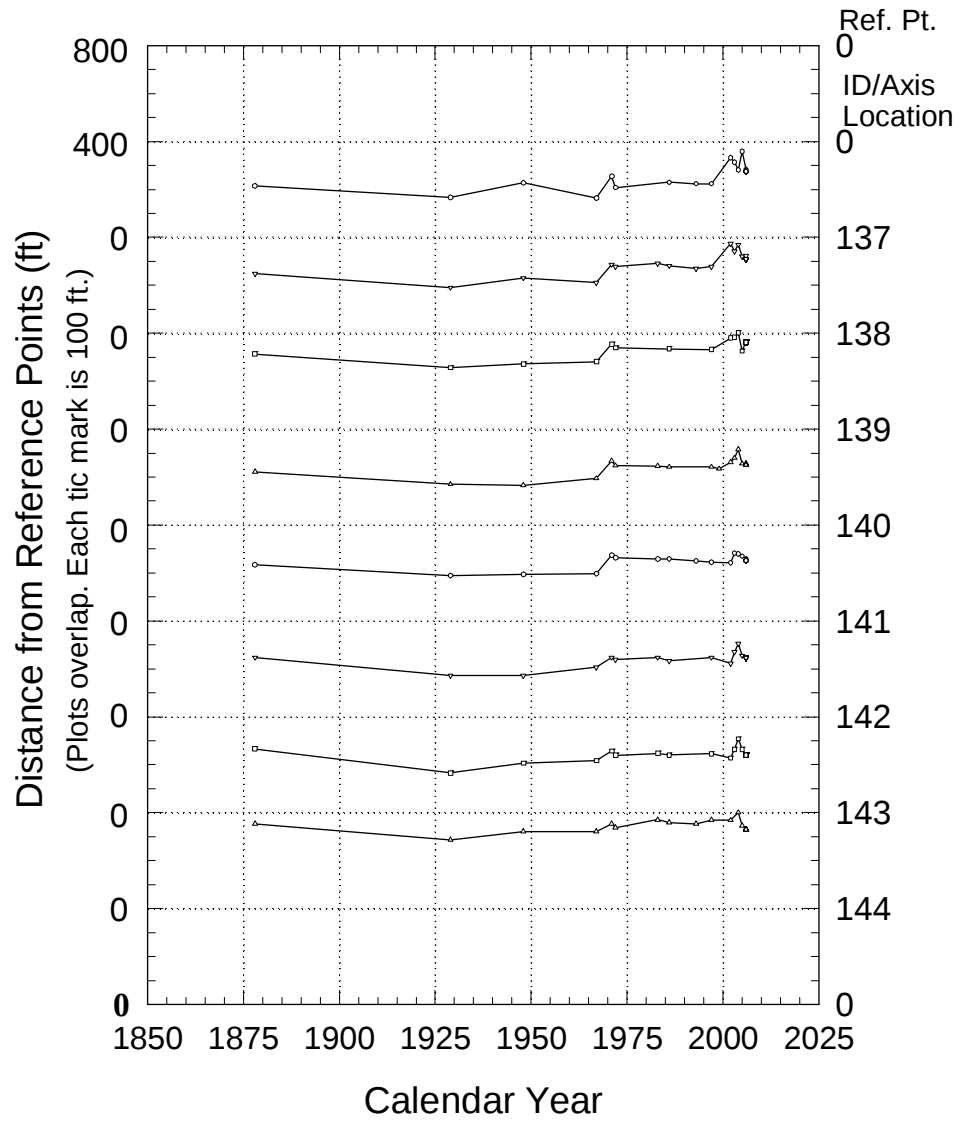

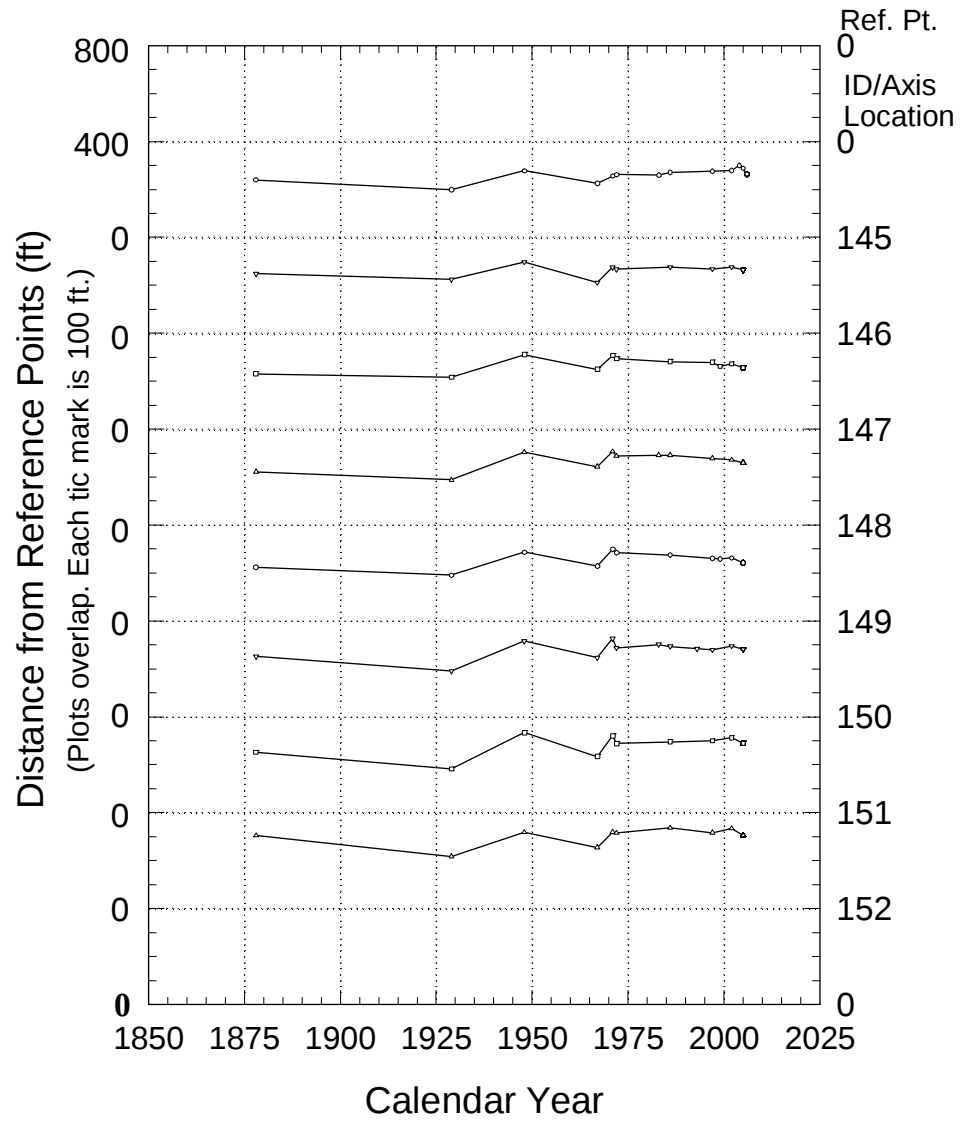

Figure 1 is a multi-panel line graph showing the distance from reference points (ft) versus calendar year (1850-2025) for eight different locations (Ref. Pt. 0 to 136). The y-axis is labeled "Distance from Reference Points (ft)" and the x-axis is "Calendar Year". The legend indicates that each tick mark on the y-axis represents 100 ft. The graph shows that the distance from the reference points generally increases over time for all locations, with some locations showing a sharp increase after 1975.
