

The graph displays the distance from reference points (in feet) for six different locations (Ref. Pt. 0, 17, 18, 19, 20, 21) over a period from 1850 to 2000. The y-axis represents the distance in feet, with a scale where each tick mark is 100 ft. The x-axis represents the calendar year. The data is plotted as lines with markers, showing the change in distance over time for each location.
