

LET'S BE CLEAR...

Simple actions help our Lagoon!

Start with keeping your
street & storm drains clean.

Are you Loyal to the Lagoon? Visit LagoonLoyal.com

A clean Lagoon starts with 4 simple actions:

1.

FOLLOW THE RULES IF & WHEN YOU FERTILIZE.

The summertime ban ends Sep 30. If you need to fertilize your lawn the rest of the year, choose 0 Phosphorus (P) and at least 50% slow-release Nitrogen (N).

2.

BLOW BACK YOUR GRASS CLIPPINGS.

Blow freshly mowed grass clippings back into your yard to fertilize your lawn! Keep grass off streets and away from the water.

3.

PICK UP AFTER YOUR PET.

Pick up after your pet right away. When pet waste is left on the ground, pollutants & harmful bacteria enter the Lagoon through stormdrains and ditches.

4.

MAINTAIN YOUR VEHICLE.

Wash your car at a commercial carwash or in your yard—never over a paved parking lot or driveway! Your yard acts like a filter to keep harmful suds and dirt off the street and out of the Lagoon.
