Subject: Parcel sewage data layer

Good Morning,

DOH has provided a data layer that links sewer/septic tank information to parcels. Catherine Murray has posted this data set to <\\tlhwrn\watershed\DOH> OSTDS. I have also copied it to the GIS library on \\gisraid\gissub\atlas\GIS_Storage

This is a very dense data layer but should be very helpful in various analyses.

As a follow-up reminder, please remind your staff to send the GIS section (Janis Paulsen, Kim Jackson, Ron Hughes) your data sets that are not available on the SDE Data Miner library. We will store them in the publically accessible folder GIS_Storage linked above. This is very helpful to the rest of the Department when we want to recreate maps and provide data to others who may not know who has the original data set.

Thanks, and let me know if you have any questions.

Regards,
Janis

Janis,

I didn't think to let you know that DOH had given us this data. The files are at watershed\DOH OSTDS. The draft OSTDS inventory report is also in that folder.

Catherine

Hi Catherine!

We would love to have this data, when can we stop by to make a copy of the data DOH provided to you?

Thanks!

Janis

Janis-

I am also glad to see this dataset being used. We recently sent a complete copy of the geodatabase on DVD to Catherine Murray in the Watershed Evaluation and TMDL Development section. I believe it went out on 9/25. Is this the same section that you work with? If you need an additional copy of the data, please let me know and I will be happy to accommodate you. In addition, we are hoping to have the data available online within the next few weeks.

Please let me know if I can be of further assistance.

Thanks.

Kara M. Loewe

Hi Janis:

Here's what you are looking for:

Statewide Inventory of Onsite Sewage Treatment and Disposal System in Florida
June 29, 2009 prepared for: State of Florida, Department of Health, Division of
Environmental Health Bureau of Onsite Sewage Programs prepared by : Pamela Hall,
EarthSTEPS LLC, Stephen Clancy, GlobalMind

I have cced the DOH staff that worked with us on this project. Kara was the
database contact and Elke was the contract manager. Please copy them to get
access to the data, full report and maps.

And please, give me a call or send email with any questions you might have.

I am VERY glad to see this inventory being put to use!
