There is no update schedule for the dataset at this time. The project was designed as a one-time inventory of the septic systems in Florida. We are hoping to develop a mechanism for this in the future, but as in all things, we don't currently have a funding source for this. I can let you know when the data are released online. We would have the potential of using this mechanism to update the data.

Let me know if you have any other questions.

Thanks.

Kara,

I have another question. The answer may be in a document somewhere, but I thought I would just ask you :) What is the update schedule for this dataset? What do I need to do to make sure we get the updates?

Thanks,
Janis

The Department of Environmental

Protection values your feedback as a customer. DEP Secretary Michael W. Sole is committed to continuously assessing and

improving the level and quality of services provided to you. Please take a few minutes to comment on the quality of

service you received. Copy the url below to a web browser to complete the DEP

survey:

Janis-

I am also glad to see this dataset being used. We recently sent a complete copy of the geodatabase on DVD to Catherine Murray in the Watershed Evaluation and TMDL Development section. I believe it went out on 9/25. Is this the same section that you work with? If you need an additional copy of the data, please let me know and I will be happy to accommodate you. In addition, we are hoping to have the data available online within the next few weeks.

Please let me know if I can be of further assistance.

Thanks.

Kara M. Loewe

Hi Janis:

Here's what you are looking for:

Statewide Inventory of Onsite Sewage Treatment and Disposal System in Florida June 29, 2009 prepared for: State of Florida, Department of Health, Division of Environmental Health Bureau of Onsite Sewage Programs prepared by : Pamela Hall, EarthSTEPS LLC, Stephen Clancy, GlobalMind

I have cced the DOH staff that worked with us on this project. Kara was the database contact and Elke was the contract manager. Please copy them to get access to the data, full report and maps.

And please, give me a call or send email with any questions you might have.

I am VERY glad to see this inventory being put to use!
