Mr. Eric Miller and Ms. Corinne Slayden
Advent Environmental
498 Wando Park Blvd. Suite 500
Mt. Pleasant, SC 29464

Dear Mr Miller and Ms. Slayden:

I appreciate the time you have devoted to the field sampling performance audit conducted at Pensacola Naval Air Station on January 9th, 2007. The audit was conducted by the Environmental Assessment Section (EAS) and included a subsequent review of sampling logs and other documentation for the audit day that were submitted to our offices.

Sampling activities were audited using the DEP SOP ("Standard Operating Procedures for Field Activities", DEP-SOP-001/01), revision February 1, 2004.

Deficiencies

All deficiencies can be found listed in the attached excel spreadsheet. Although there were several issues with sample collection, sample documentation, and calibration procedures the overall data quality was not affected.

Response requirements
The permittee or the permittee's consultant should respond to the audit report by addressing each deficiency noted in the attached spreadsheet, in the space provided. The response should include the specific corrective actions to be taken. Some items may indicate that additional information should be provided in order to determine whether the audit criterion is applicable or was satisfied. The response may include discussion of any items in the report for the purposes of clarification or rebuttal. Please return spreadsheet via e-mail. If no response is received an assumption will be made that appropriate corrective actions will have been implemented to insure problems noted will be corrected in the future.

Issuance of final audit report
The response must be received within **45 days** of the issued date at the top of this letter; after which this letter will be considered the final report. The response will be reviewed by the EAS and determine if appropriate corrective actions have been taken. When all responses have been reviewed, the EAS will consider this letter as the final audit report if no additional changes need to be made.

Please let me know if you have any questions or need further assistance.

Sincerely,

Thomas Deck
