Re.: FPL EnergySecure Natural Gas Pipeline, Application NG09-02
Okeechobee County Agency Report

Dear Ms. Seiler:

Okeechobee County finds that there are no outstanding corridor location issues or outstanding sufficiency issues pertaining to the siting application for the FPL EnergySecure natural gas pipeline.

No variances to County standards or special use permissions have been requested or are anticipated, although compliance with applicable County regulations including obtaining permits for any work that may occur in a County right-of-way is required.

Okeechobee County recommends certification of the proposed natural gas pipeline and corridor.

You may contact me at (863) 763-5548 with any questions or inquiries.

Sincerely,
