

Attachment B

Suggested New Condition of Certification

ATTACHMENT B

Suggested New Condition of Certification for PEF Levy Nuclear Project

XXVII

M. Submittals for Activities Within Wetlands or Other Surface Waters

1. Prior to the projected commencement of construction of a portion of the Certified Facility, including the heavy haul road, site access roads and the makeup and blowdown pipelines in wetlands or other surface waters of the state, PEF shall provide to either DEP's Southwest or Northeast Districts' Environmental Resource Permitting Sections, as appropriate, all information necessary for a complete Joint Environmental Resource Permit application, DEP Form No. 62- 343.900(1), for that portion of the Certified Facility. Information may be submitted by discrete portions of the Certified Facility. The completed form for each portion shall be reviewed pursuant to Condition X. "Construction" in this context shall include land clearing, excavation, the placement of fill materials, and related activities.

2. The post-certification submittal(s) shall include a signed and sealed Professional Land Surveyors' survey of wetland and surface water areas as defined pursuant to Chapter 62-340, F.A.C., and verified by appropriate agency staff. Available DEP-approved wetland and surface water verifications within the boundaries of the Certified Facility may be used and reproduced for this delineation consideration.
