RE: Progress Energy Florida
Levy Nuclear Plant Units 1 and 2
Site Certification Application; PA 08-51

Dear Mr. Halpin:

Please find enclosed supplemental material for the Levy Nuclear Plant's Site Certification Application related to the recent discussions with the Southwest Florida Water Management District regarding clarifying information for the Project site. This material consists of two memorandums prepared for Progress Energy by CH2M Hill entitled "Analysis of Water Quality and Biological Conditions for the Old Withlacoochee River Channel – PEF Proposed Levy Nuclear Plant" and "Revised Conceptual Wellfield Layout and Evaluation of Simulated Drawdown Impacts, Levy Nuclear Plant." The second memorandum updates and replaces the memorandum of the same name dated August 10, 2008 as provided as supporting documentation for the response to completeness item VII.A (RAI Number LNP SCA RAI-122) in the response documented submitted under the August 12, 2008 cover letter to you. This material does not constitute an amendment to the SCA.

These supplemental documents are being distributed by PEF along with a package (under separate cover) of replacement and supplemental SCA pages to address other recent changes to the Project.

Should you have any questions concerning this matter, please contact me at John.Hunter@PGNmail.com or at 727-820-5764.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Hunter", written over the word "Sincerely,".

Jamie Hunter
Lead Environmental Specialist
Progress Energy Florida
