RE: Progress Energy Florida
Levy Nuclear Plant Units 1 and 2
Site Certification Application; PA 08-51
Revision 2

Dear Mr. Halpin:

Please find enclosed a set of substitute pages for Progress Energy Florida's (PEF's) Site Certification Application for the Levy County Nuclear Plant Units 1 and 2 and associated facilities. Pursuant to PEF's Notice of Amendment of the Site Certification Application (SCA) filed November 26, 2008 in the Division of Administrative Hearings Docket No. 08-2727EPP, PEF is amending the SCA to revise or withdraw various sections of the SCA, as noted in the enclosed revision tracking sheet. These sections address the withdrawal of the previously proposed industrial rail spur corridor from the project.

The intent of this revision to the SCA is to remove text, tables and figures references related to the previously proposed rail spur corridor. Any ancillary references to the rail spur corridor contained within the SCA, including associated attachments, are purely incidental and remain only to provide context where removal may cause additional confusion.

Please update your hard copy of the SCA by removing the previous Rev. 0 pages and replacing them with the enclosed Rev. 2 substitute pages.

Thank you for your attention to this matter. Should you have any questions concerning this matter, please contact me at John.Hunter@PGNmail.com or at 727-820-5764.

Sincerely,

Jamie Hunter
Lead Environmental Specialist
