Re: Occidental Chemical Corporation - Certification of
Eligible Pollution control Equipment

Dear Mr. Goolsby:

The material submitted by Occidental Chemical Corporation for eligibility of exemption from ad valorem assessment pursuant to section 193.621, Florida Statutes, still does not meet the requirements of Florida Administrative Code Rule 17-8, specifically the requirements of section 17-8.040(2) which require information prepared by a professional engineer registered in the State of Florida.

The preliminary determination of Occidental's list attached to your letter of May 5, 1994, is similar to my evaluation of September 1993. In my opinion the Analytical Lab fume hood equipment, cost center #0908 are primarily for worker safety not pollution control and therefore not eligible under s. 193.621. The recycle sign in cost center #0330 is not eligible. The discontinued sand filters in cost center #0608 is not eligible. I have questions about the eligibility of the items in cost center #0636. Cost Center #0636 is for process water. In my opinion process water is used to make a product and is therefore not primarily for pollution control. There may be some eligible items within that cost center which Occidental's engineer could justify. The capacitors in cost centers #0440 and #0450 do not appear to be eligible. The steam snuffer system in cost center #0510 may not be eligible. Is the snuffer primarily for safety or for pollution control? The lift pump auxiliary generator in cost center #0559 is probably not eligible. The remaining equipment appears eligible.

When Occidental's engineer certifies the listed equipment whose primary purpose is pollution control, I will be glad to

Page 2

make a final determination. If Occidnetal would like to set up a meeting, my telephone number is (904) 487-0472.

Sincerely,

Hamilton S. Oven

Dear Mr. Oven:

Enclosed is a detailed listing of pollution control equipment filed as part of Occidental Chemical Corp. 1994 Tangible Personal Property Tax Return.

You advised in your September 13, 1993 letter you would need additional information from Occidental. They will arrange a conference with the appropriate engineer if you will give them a call in the Houston office at 713/840-3024.

Your attention in this matter is very much appreciated.

Sincerely,

David Goolsby, Jr.

Dear Mr. Goolsby:

Attached is a detailed listing of pollution control equipment filed as a part of Occidental's 1994 Tangible Personal Property Tax Return per your request of April 13, 1994.

In reading the letter from Hamilton S. Owen of the Florida Department of Environmental Protection, dated September 13, 1993, it appears that he needed additional information or had questions on certain expenditures on the 1993 list, particularly for the process water areas. If this is still the case for the 1994 filing, I will arrange a conference for him with the appropriate engineer so that Mr. Owen's concerns can be addressed. Give me a call when he is available.

If we can provide any other information, please let me know.

Sincerely,

George Hargett
