Re: Occidental Chemical Corporation, White Spring's Facility
Certification of Pollution Control Equipment

Dear Mr. Goolsby:

I have reviewed the materials attached to the certification by R.E. McNeill, P.E. dated March 29, 1995, concerning the Occidental Chemical corporation's White Springs Facility. Attached to the certificate is information that list and describe various components of the White Spring's Facility showing costs and allocations of costs. After reviewing the material submitted, it is my opinion that the listed equipment is eligible for assessment at salvage value pursuant to ss 193.621(4), F.S.

If you have any questions on this matter, please contact me at (904) 487-0472.

Sincerely,

Hamilton S. Oven, P.E.

SITING COORDINATION

I certify that the attached report to the best of my knowledge and belief is a true and correct list of pollution control equipment and associated expenditures located at Occidental Chemical Corporation's White Springs facility in Hamilton County, Florida.

R. E. McNeill

Florida P.E. No. 12813

Attachment To The
1995 List of Pollution Control Equipment**

Cost Center #0636 - Process Water

All of the equipment reported under this cost center is necessary because of various regulations and permits that require process water to be 100% recirculated, except after extreme (25 year) rainfall events. This equipment was installed to assure recirculation as required by law.
