Re: Florida Power Corporation - Intercession City

Dear Mr. Griffin:

I have reviewed the list of equipment for the Intercession City facility as attached to your FAX of May 6, 1996. There is insufficient information for me to determine if the primary purpose of the is for pollution control as required by section 193.621, Florida Statutes. Please have Florida Power corporation submit a justification from an engineer registered in the State of Florida that the primary purpose of the equipment is pollution control along with an explanation of the pollution control function of each category of equipment. The submission of the statement from an engineer is required by Florida Administrative Code Rule 62-8.

If you have any questions about this determination, I can be reached at (904) 487-0472.

Sincerely,

Hamilton S. Oven
Hamilton S. Oven, P.E.
