RE: South Broward Resource Recovery Facility (PA 85-21)  
Amendment Approval Update and Approval (AM11-012)  
Ash Metal Recovery Building Conveyor System

Dear Mr. McIlvaine:

The Department of Environmental Protection's Siting Office is in receipt of your March 27, 2012 request to revise the layout of the ash and metal recovery system building conveyor system at the South Broward Resource Recovery Facility (SBRRF) as approved under Amendment AM11-012.

On October 4, 2011, the Florida Department of Environmental Protection's (Department) Siting Coordination Office received a request from Wheelabrator South Broward Inc. for an amendment to the SBRRF Site Certification Application (SCA) for the use of a portable conveyor/magnet system at the adjoining ash monofill to recover ferrous metal that the current system was unable to capture. The Department determined on November 1, 2011 that the request was an amendment to the application that did not require modification to the Conditions of Certification pursuant to Section 62-17.205(c), F.A.C. and approval for the ash conveyor replacement was granted.

The Department acknowledges your March 27, 2012 request to alter the ash conveyor replacement design. SBRRF shall submit a revised ash residue management plan to the Department's Southeast District Office Solid Waste Section including the revisions to the conveyor system.

Any questions regarding the Department's review of your amendment request should be directed to Bobby Bull, P.E. at (850) 245-2001.

Sincerely,

Cindy Mulkey  
Administrator,  
Siting Coordination Office

South Broward RRF
