Project Description
The federally-authorized Bal Harbour Segment - Miami-Dade County Shore Protection Project is located between DEP monuments R27 and R31 in Miami-Dade County. Since 1975, the 0.75 mile long segment part of the Beach Erosion Control (BEC) and Hurricane Protection Project (HP) has received periodic nourishments and numerous projects to address localized erosional hotspots. Eleven additional nourishments have been completed since conception. The requested funds are for permit-required post-construction monitoring of the latest nourishment project completed by the United States Army Corps of Engineers (USACE) in April 2022. Staff have determined that 100% of the project is eligible for state cost sharing.
