Project Description
The Bonita Beach Groin Repair Project is located between DEP monuments R226 and R230 in Lee County. The first restoration was completed in December of 1995. This project included two terminal groins. The groins were designed and constructed in 1994-1995. The southern groin was damaged due to Tropical Storm Gabrielle and it was repaired in 2003. Hurricane Ian in 2022 damaged the groins and the functionality is presently compromised. The groins are to be repaired to their original plans in 1994/1995. The requested funds are for construction and post-construction monitoring. Staff have determined that 74.5% of the project is eligible for state cost sharing.

Funds will be used for (list project phase, specify which phase is reimbursement, if applicable)
Construction (FY24/25 reimbursement) and post-construction monitoring (1st year, current FY25/26)
