Subject: Early Gulf Restoration Projects.

Please see the attached. We are seeking additional funding to support the Fruit Farm Creek Restoration Project near Marco Island, Florida. We have received \$75,000 in funding to date from the US Fish and Wildlife Service. Total cost of the entire restoration is now estimated at \$675,000. We expect to have all permits in place for the project within 2 months.

Any additional information on how to formally submit this project for additional funding would be appreciated.
