

PROJECT MAPS

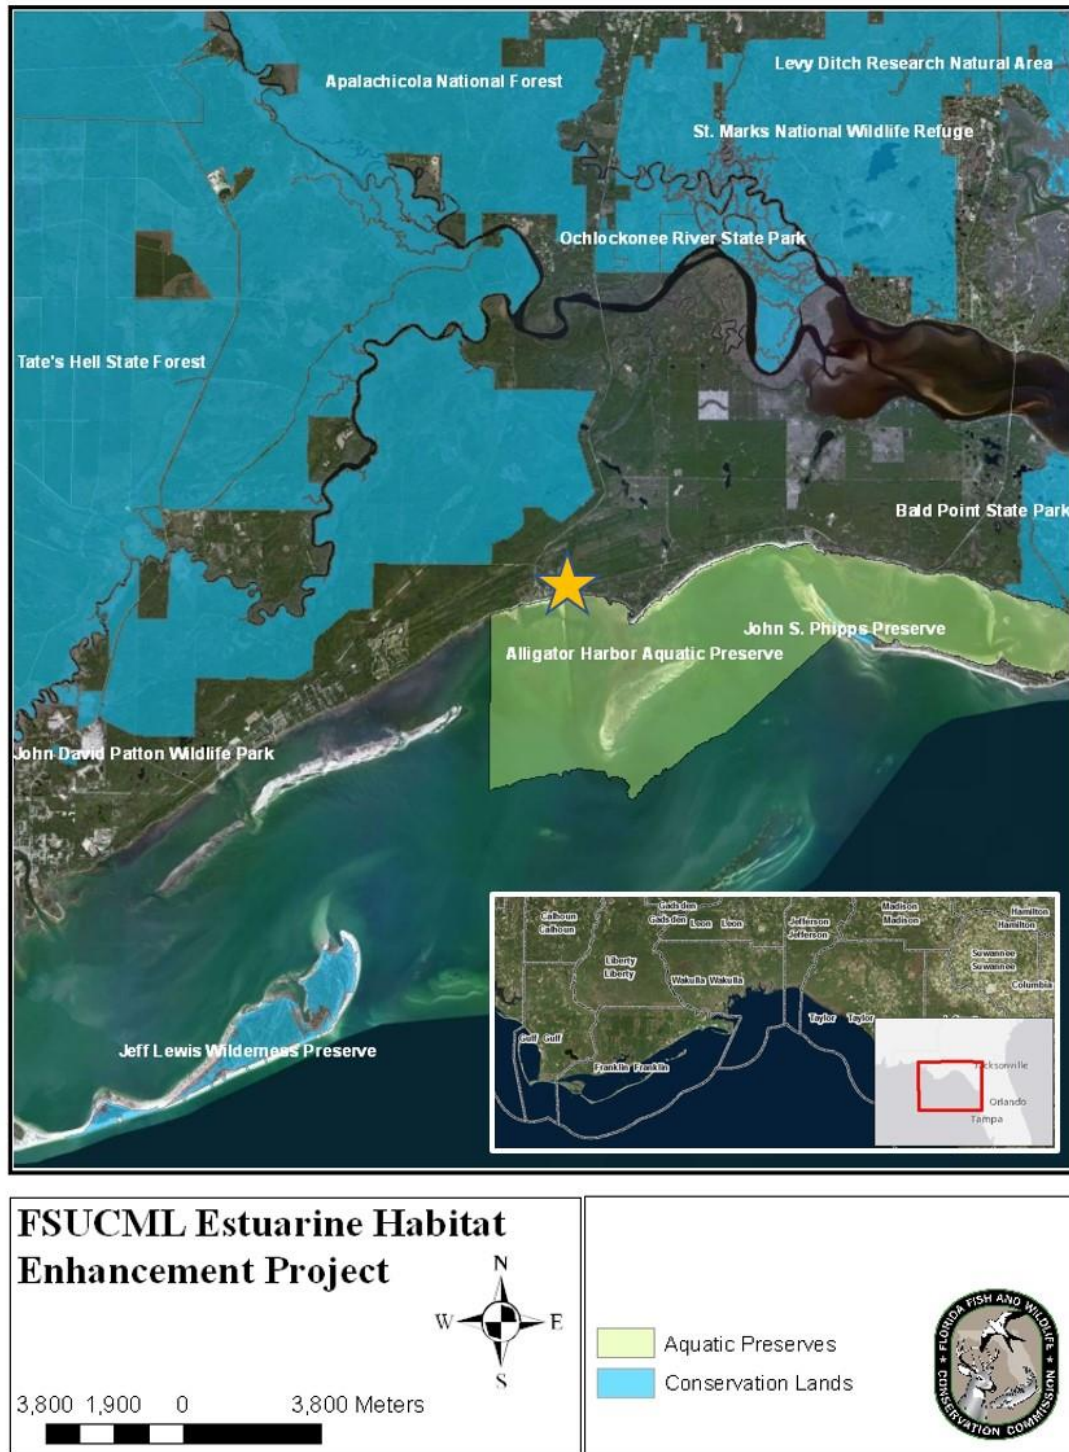

Figure 1. The Estuarine Habitat Enhancements at Florida State University Coastal and Marine Laboratory (FSUCML) project site is in St. Teresa, Franklin County, Florida and within the Alligator Harbor Aquatic Preserve.

PROJECT MAPS

Figure 2. The Estuarine Habitat Enhancement at FSUCML project will create or enhance intertidal and coastal habitats including approximately: (1) 2 acres of saltmarsh; (2) 1.6 acres of oyster reef (including subtidal oyster reef breakwater structures, oyster shell bag reefs and low-profile, intertidal oyster habitat); and (3) 0.2 acre of shorebird nesting habitat.
