

Conflicts or Complements to Existing Efforts

The proposed project will further the goals and objectives of the City of Marianna, Comprehensive Plan, Conservation Element as it relates to preservation and construction in environmentally sensitive soils, wetlands, flood zones, natural vegetative areas, wildlife habitats and areas along the Chipola River (see attachment). The project will also further Goal 1 in the City of Marianna, Comprehensive Plan, Future Land Use Element by protecting the health, welfare, safety and quality of life of citizens in Marianna (see attachment). The area where the stormwater detention pond will be located is owned by the State of Florida and managed by the City of Marianna. The land was purchased to address stormwater related issues and to provide pedestrian trails for the enjoyment of citizens and visitors.
