

Florida Restoration Area

Lower Suwannee National Wildlife Refuge Hydrologic Restoration (planning and design)

PROJECT DESCRIPTION

This project includes planning and design activities to analyze existing information and conduct modeling to determine the most effective locations for restoration actions to improve hydrologic conditions in the Lower Suwannee National Wildlife Refuge. Activities include compilation and analysis of water quality data, hydrologic assessment and modeling of overland flows to identify locations where culvers, low water crossing, and road remove can be used to restore flows, and design of a restoration strategy. The Florida Department of Environmental Protection would be the implementing Trustee for this project.

RESTORATION TYPE

Water Quality

ESTIMATED COST

\$500,000
