Re: Support for New Creek to Choctawhatchee River Florida Forever Project

Dear Mr. Bradner:

I am writing on behalf of the Florida Wildlife Corridor Foundation, an organization committed to protecting and restoring our wild places in Florida. Please consider this letter as an expression of support for the Trust for Public Land's (TPL) new Florida Forever Project Application, Creeks to Choctawhatchee River. The proposed fee simple acquisition in Walton County, Florida would protect approximately +/- 2,222 acres of timberland and forest in the Florida Wildlife Corridor. Ultimately the acquisition of Creeks to Choctawhatchee River would support the state's continued commitment to stewardship of our state's natural resources while safeguarding the water quality of the Choctawhatchee River, an Outstanding Florida Water.

This project protects many creeks that serve as tributaries to the Choctawhatchee River while providing base buffering benefits to Eglin Air Force Base. The proposed project also benefits the Northwest Florida Sentinel Landscape Partnership's goals by conserving and restoring habitat and water resources while protecting military mission readiness as well as the Gulf Coastal Plain Ecosystem Partnership's goals of restoring and protecting the longleaf pine ecosystem. The Florida Forest Service has agreed to manage the property which will create opportunities for sustainable timber management and potential restoration of long leaf pine. The project itself is listed for sale and comprised of 23-unique parcels presenting a unique opportunity to protect an intact landscape and create an anchor for protected lands in this portion of the Wildlife Corridor. The project supports a variety of species like the gopher tortoise, the Florida black bear, white-tailed deer, wild turkey, and many other species. For these reasons, we strongly support this project.

We thank you and the ARC Board for your strong leadership to protect significant conservation lands that will be invaluable to the future of our state's land, water, agricultural, and recreational resources.

Sincerely,

Mallory Dimmitt

Chief Executive Officer

Florida Wildlife Corridor Foundation
