

SAVE CAYO COSTA NARROWS FROM **COMMERCIAL EXPLOITATION PETITION**

**STOP COMMERCIAL ACTIVITIES ON CAYO COSTA STATE
PARK'S MOST VULNERABLE SOUTH BEACH!**

**I'm against the Florida Department of Environmental Protection (DEP)/
Division of Recreation and Parks (DRP) mismanagement of Cayo
Costa State Park's narrowest and most vulnerable south beach
known as "the narrows" in Lee County.**

Background: Since 2016 the DEP/DRP has allowed their concessionaire to land thousands of people each month at a new "south dock". Large 50' commercial ferry boats traverse shallow, sensitive seagrass flats at all tides and there is no limit to the number of people they can bring each day or the activities they can conduct. This increased large boat and foot traffic, at the most vulnerable point of the island, is negatively impacting the seagrass beds, sea oat/sand dune systems, and shorebird and turtle nesting activities. The "narrows" are subject to erosion and wash over.

**Private boaters are no longer welcome at the publicly owned "south dock", a
bayside access point of boaters and kayakers for many years. Signs currently say
DO NOT BLOCK 6:30 AM – 7:30 PM and DEP/DRP is proposing a permanent end
to what has been historically light private boater usage.**

Stop this now! Add my name to the growing list of people who oppose this!

SAVE CAYO COSTA NARROWS FROM COMMERCIAL EXPLOITATION PETITION

**STOP COMMERCIAL ACTIVITIES ON CAYO COSTA STATE
PARK'S MOST VULNERABLE SOUTH BEACH!**

**I'm against the Florida Department of Environmental Protection (DEP)/
Division of Recreation and Parks (DRP) mismanagement of Cayo
Costa State Park's narrowest and most vulnerable south beach
known as "the narrows" in Lee County.**

Background: Since 2016 the DEP/DRP has allowed their concessionaire to land thousands of people each month at a new "south dock". Large 50' commercial ferry boats traverse shallow, sensitive seagrass flats at all tides and there is no limit to the number of people they can bring each day or the activities they can conduct. This increased large boat and foot traffic, at the most vulnerable point of the island, is negatively impacting the seagrass beds, sea oat/sand dune systems, and shorebird and turtle nesting activities. The "narrows" are subject to erosion and wash over.

Private boaters are no longer welcome at the publicly owned "south dock", a bayside access point of boaters and kayakers for many years. Signs currently say DO NOT BLOCK 6:30 AM – 7:30 PM and DEP/DRP is proposing a permanent end to what has been historically light private boater usage.

Stop this now! Add my name to the growing list of people who oppose this!
