Re: Relinquishment of Site Certification - PA82-17S

Dear Ms. Mulkey:

CEMEX Construction Materials Florida, LLC ("CEMEX"), and Brooksville PP Assets Holding Company, LLC ("BPP"), as owners/operators and licensees of the CEMEX Brooksville South Cement Plant and BPP steam electric generating plant, respectively, request relinquishment of the Certification for those facilities. The steam electric generating plant has been shut down and rendered no longer operational as of June 30, 2018, and therefore does not require certification under the Florida Electrical Power Plant Siting Act. All remaining infrastructure and associated facilities will continue to operate as a cement production plant and will be regulated by applicable federal, state, and local permits. A list of the applicable permits for the cement production facilities is attached.

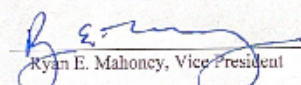

Thank you for consideration of this request. If you have any questions or require additional information, please contact Lillian Deprimo, CEMEX Senior Director Environmental US Cement Operations at (865) 719-9925 or lillian.deprimo@cemex.com.
