**Re: Lee County Resource Recovery Facility (LCRRF), PA90-30H  
Amendment Request AM24-300  
Post Certification Amendment-RAI Response  
WACS Facility ID: 93715**

Dear Mr. Senn:

On May 22, 2024, Lee County Solid Waste received a request for additional information for our Amendment Request (AM24-300). Our response is as follows:

### Solid Waste

1. *Form 62-701.900(4), F.A.C. identifies that no construction is proposed with the modification. Please update the form as needed to identify what is being done to ensure that the areas where Class III waste is received will be under roof and on an impervious surface. If no roof is proposed, please provide a leachate control system in accordance with 62-701.710(3)(b), F.A.C. [62-701.710(1)(d)3, F.A.C.]*

The CDDRF is an existing facility that consists of amongst other structures and equipment, a continuous impervious surface and 2 separate preexisting bunkers constructed out of concrete bin blocks. A prefabricated, 3-sided cover will be attached to each of these existing structures as a roof, therefore no construction will be necessary. Attachment 1 consists of the prefabricated cover drawings from Big Top Services as well as pictures of a 2-sided cover that is currently being utilized at one of our transfer stations to cover recyclables.

2-4. *Please correct the rule reference in Section 3.16 of the operations plan. Solid waste record keeping requirements for waste processing facilities are in 62-701.710(8), F.A.C. [62-701.710(8), F.A.C.]*

*Please update the Operations Plan to include procedures for the facility when the permitted capacity has been met. [62-701.710(4)(i), F.A.C.]*

*Please update the Contingency Plan, Section 5.0 of the Operations Plan, to be in conformance with Rule 62-701.320(16), F.A.C. [62-701.710(2)(g), F.A.C.]*

Attachment II-a is a revised Operations Plan with changes tracked and Attachment II-b is a clean version of the revised Operations Plan.

### ERP

1. *Because additional impervious area is proposed, please submit an application form for an Environmental Resource Permit and fill out sections A and E.*

Attachments III & IV consist of Sections A & E of the Environmental Resource Permit application.

2. *Please provide plans and calculations for the project, signed and sealed by a Florida professional.*

Attachment V is the signed and sealed stormwater plan and calculations.

### Water and Wastewater Utilities

1. *Please provide a complete, signed, and sealed Application for Constructing a Domestic Wastewater Collection System Form. The form number is 62-604.300(3)(a). [Conditions of Certification, Section B.I.H.1]*

Attachment VI is form number 62-604-300(3)(a).

2. *Please clarify if any of the other proposed buildings identified on the General Site Plan will be constructed as part of the project, and if they will have water or wastewater services. [62-4.050(1)]*

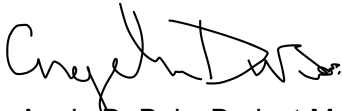

Please find the civil drawings as Attachment VII. No other buildings will be constructed as part of this project.

3. *Please identify the line just north of the water service line on sheet number 8 of the Utility Plan. [62-4.050(1)]*

Please find the pump station design as Attachment VIII.

If you have any questions please reach out to me at [adubois@leegov.com](mailto:adubois@leegov.com) or 239-707-1537. I would also like to offer the South District FDEP office the opportunity to visit the site and review the details of the project to assist with better clarification of existing conditions and proposed changes.

Sincerely,

A handwritten signature in black ink, appearing to read "Angie DuBois".

Angie DuBois, Project Manager  
Lee County Solid Waste Department
