Permit Files

Dear Mr. Statom:

This is to acknowledge receipt of the Proposed Groundwater Monitoring Plan revisions dated August 1994, received by the Department on November 9, 1994 for your facility.

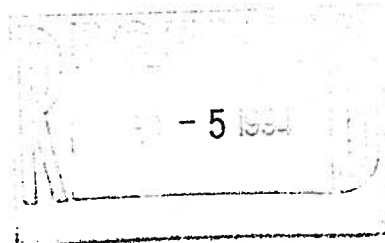

- [] This letter constitutes notice that a permit will be required for your project pursuant to Chapter(s) _____, Florida Statutes.
- [] Your application for permit is complete as of _____ and processing has begun. You are advised that the Department under Chapter 120, Florida Statutes, must take final action on your application within ninety (90) days unless the time is tolled by administrative hearing.
- [] Your application for permit is incomplete. Please provide the information listed on the attached sheet(s) promptly. Evaluation of your proposed project will be delayed until all requested information has been received.
- [] The additional information received on _____ was reviewed, however, the item(s) listed on the attached sheet(s) remain incomplete. Evaluation of your proposed project will continue to be delayed until we receive all requested information.
- [X] At this time no permit is required for your project by this Department. Any modifications in your plans should be submitted for review, as changes may result in permits being required. This letter does not relieve you from the need to obtain any other permits (local, state or federal) which may be required. The groundwater monitoring plan revisions are complete as submitted.

If you have any questions, please contact me at telephone number 407-433-2650 of this office.

Sincerely,

Joseph Lurix

Subject: WQMP for NCRRRF

Subject: Proposed Monitoring Plan for the North County Regional Resource Recovery Facility, Solid Waste Authority of Palm Beach County, dated August 1994 and received on November 9, 1994, prepared by Camp Dresser & McKee.

The Waste Cleanup Section has reviewed the referenced document. The document was found to be complete, thoroughly addressing all of the requirements of Rule 62-701.510, F.A.C. for water quality monitoring (surface water, groundwater and leachate water quality parameters and sampling frequencies), monitoring well placement and spacing, assessment monitoring and corrective actions, and water quality reporting requirements; and, therefore, the proposed monitoring plan is approved.
