Re: Cargill Fertilizer, Inc.

Dear Mr. Barnes:

I have reviewed the list of equipment for Cargill Fertilizer as attached to your FAX of September 13, 2001. Most of the equipment on the list appears to be eligible for assessment as pollution control equipment pursuant to section 193.621, Florida Statutes. The taxpayer's engineer needs to submit an explanation why the following items of equipment are "*primarily*" for the purpose of pollution control:

Item	Description
458163	Heat Exchanger on #4 Evaporator
482249	#4 Filter Access Stairs/Platform
409166	Heat Exchanger 1-4 Evaporators
379352	P/A #5 Filter Hoist

If I can be of further assistance, please contact me at Suncom 277-0472.

Sincerely,

Hamilton S. Oven

Re: Cargill Fertilizer, Inc., Bartow Phosphate Fertilizer Plant

Dear Mr. Barnes:

I have reviewed the list of equipment for Cargill Fertilizer for the Bartow Phosphate Fertilizer Plant as attached to your FAX of January 15, 2002. The equipment on the list as certified by Chuck Burns, P.E. appears to be eligible for assessment as pollution control equipment pursuant to section 193.621, Florida Statutes.

If I can be of further assistance, please contact me at Suncom 277-0472.

Sincerely,

Hamilton S. Oven

Re: Cargill Fertilizer, Inc., South Fort Meade Mine & Beneficiation Plant

Dear Mr. Barnes:

I have reviewed the list of equipment for Cargill Fertilizer for the South Fort Meade Mine & Beneficiation Plant as attached to your FAX of January 15, 2002. The some of the equipment on the list as certified by Chuck Burns, P.E. appears to be eligible for assessment as pollution control equipment pursuant to section 193.621, Florida Statutes. Some of the listed equipment appears to be primarily for the purpose of mine reclamation which is not pollution control as contemplated by s. 193.621, F.S. Two items the E and W well water pump aeration ponds may be more for the purpose of process use than pollution control. Additional justification should be submitted if these items are to be considered eligible. I am attaching to this letter a copy of your FAX with questionable items circled or highlighted.

If I can be of further assistance, please contact me at Suncom 277-0472.

Sincerely,

Hamilton S. Oven

Hamilton S. Oven, P.E.

**Certification of Pollution Control Equipment for the South Fort Meade
Mine & Beneficiation Plant Polk County, Florida**

Based on the information provided by the South Fort Meade Mine & Beneficiation Plant regarding processes, equipment, operations, and environmental pollution permits at the Polk County Complex, I Chuck Burns, P.E., certify that the attached list of pollution control devices are used for various of forms abatement or elimination of pollution, including air, water and hazardous waste.

This certification is made in support of a certification application for pollution control equipment that qualifies under Florida guidelines (Fla. Stat. ch. 193.621) for pollution control, a "Return of Pollution Control Devices for Ad Valorem Tax Purposes". The attached designation of pollution control equipment identifies any machinery, equipment and facilities whose purpose could be reasonably ascertained to be for the treatment of industrial wastes which are not productive assets and/or represent increased operating expenses to the owners without financial return.

Dated: 10/25/01Chuck Burns, P.E.

Randy:

I received the attached letters Friday from the engineers concerning our request for pollution control reclassification (from machinery and equipment). Was this the information that you were looking for to provide to the DEP? Please call me to discuss as I would like to withdraw our appeal as soon as possible and save everyone some time. If I'm not there, please leave a message as to when would be the best time to get hold of you early this week (FYI - I have a meeting Monday morning from 8-12 CST).

Thanks for your help.
